In a few weeks she was installed in her new home and made acquainted with her new duties. Among other things she was told that it was customary when breakfast was ready to be served to ring the breakfast bell. Her "all right, mum," came in such a confident tone that her mistress gave the matter no further thought.

The following morning at 6 o'clock the family were rudely awakened by the violent ringing of the front doorbell. Thinking that a messenger must be walting with some unusual message, the gentleman of the house did not stop to dress, but hurried down in his night robe and opened the door. The new kitchen girl awaited him, her face beaming with a beautiful smile of triumph. Bowing low, she said in her rich Irish brogue, "Breakfast is ready, sor."-Los Angeles Times,

Diamond Cutting. It is said that before the fourteenth century no one knew how to cut and polish diamonds. They were esteemed for their marvelous hardness, but not greatly admired for beauty. There is a tradition that a journeyman jeweler in Flanders, Louis Van Berghem, discovered the art of cutting diamond with diamond. But it is probable that he only made some notable advance in the art since associations of diamond cutters had existed in France and Flanders from the fourteenth century. Louis Van Berghem's most famous achievement was the cutting and pol isking of a huge diamond belonging to Charles the Bold. Charles was so delighted with the result that he rewarded the artist liberally and declared that the diamond would now serve him for a bedroom lamp. This jewel which was found on Charles' body after the battle of Nancy, is still in existence and celebrated under the name of the Sancy diamond .- Youth's Companion.

The Story of a Medicine.

Its name-"Golden Medical Discovery" was suggested by one of its most important and valuable ingredients - Golden Seal root. Nearly forty years ago, Dr. Pierce discovered that he could, by the use of pure,

triple-refined glycerine, aided by a certain degree of constantly maintained heat and with the aid of apparatus and appliances designed for that purpose, extract from our most valuable native me-

famed "Golden Medical Discovery," for the cure of weak stomach, indigestion, or dyspepsia, torpid liver, or biliousness and kindred derangements was first made, as it ever since has been, without a particle of alcohol in its make-up.

A glance at the full list of its ingredients, printed on every bottle-wrapper, will show that it is made from the most valuable medicinal roots found growing in our American forests. All these ingredients have received the strongest endorsement from the leading medical experts teachers and writers on Material Medical who recommend them as the very best remedies for the diseases for which best remedies for the diseases for which "Golden Medical Discovery" is advised.

A little book of these endorsements has

been compiled by Dr. R. V. Pierce, of Buffalo, N. Y., and will be mailed free to any one asking same by postal card, or letter addressed to the Doctor as above. From these endorsements, copied from standard medical books of all the different schools of practice, it will be found that the ingredients composing the "Golden Medical Discovery" are advised not enly for the cure of the above mentioned diseases, but also for the cure of all catarrhal, brenchial and throat affections, accompanied with extarrhal discharges. accompained with catarrhal discharges, hearseness, sore throat, lingering, or hang-on-coughs, and all those wasting affections which, if not promptly and properly treated are liable to terminate in consumption. Take Dr. Pierce's Discovery in time and persevere in its use until you give it a fair trial and it is not likely to disappoint. Too much must not be expected of it. It will not perform miracles. It will not cure consumption in its advanced stages. No medicine will. It will cure the affections that lead up to consumption, if taken in time.

In less than 30 years, an expert of the forest service estimates that all of his wife's feet. the virgin timber in the United States will have been cut. The per capita consumption per year in this country is now 500 feet, boord measure, in Europe it is only 50 feet. So grave is the peril that confronts the forest and future welfare of the country, that the forest service is redoubling its efforts to have lumbermen not only to speech in some obscure campaign in a cut more conservatively, but to plant Smoot.
